Name
Title, Company

What do we offer

We provide you with what is needed for a secure Microsoft 365 and Azure platform. We will help you to accelerate your response with incident-level visibility and automatic disruption of cyberattacks like ransomware with extended detection and response (XDR).

Fellowmind's Managed XDR Service optimizes Microsoft Sentinel and Microsoft 365 Defender. And we include our Security Operations Center (SOC) with 24/7/365 monitoring and response capabilities.

Value for the customer

Our Managed XDR Service empowers your organization to fully utilize the Microsoft 365 Defender suite. With our experienced team at your disposal, incidents are managed 24/7/365. We enrich these incidents with threat intelligence and human analysis, taking necessary responsive actions. Our service features continually enhanced detection capabilities, fortified with custom rules. During our monthly cybersecurity review, we'll walk you through the current risk landscape and provide expert advice on optimizing your prevention configurations.

Fellowmind

Features & details of the service/solution

When should you consider our service?

- If you require experts to help deploy and run a managed extended detection and response service on all your Microsoft 365 Defender products.
- If you require 24/7/365 managed threat detection and response.
- If you require experts to help deploy and run Microsoft Sentinel.

What do we do?

- Identify, contain, respond to and remediate threats across Microsoft Sentinel and Microsoft Defender products, like Defender for Office 365, Defender for Identity, Defender for Cloud apps, Defender for Identity and Defender for Cloud.
- Continuous improvement and tuning of the service to keep up with the evolving threats landscape and adapt to your environment.
- Always-on monitoring across all your active Microsoft Defender products and Security Analysts ready to take action round-the-clock, every day of the year, to ensure incidents are contained.
